

Testing User Stories – Store Owner

As a Store Owner I want to be able to:

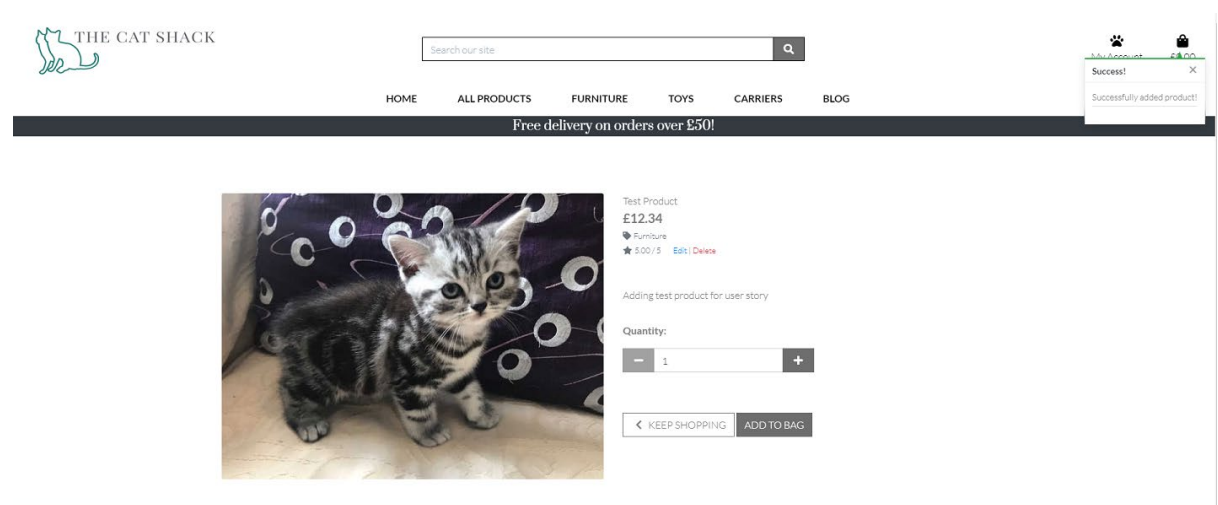

- Add Products

Products can be added by the following form.

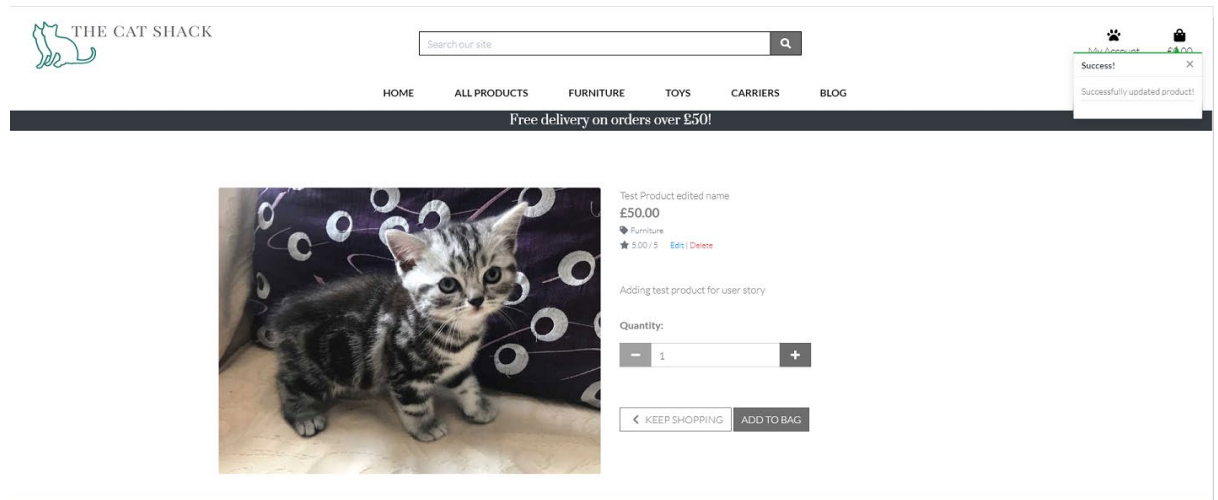

The screenshot shows the 'THE CAT SHACK' website header with a logo, search bar, and navigation links (HOME, ALL PRODUCTS, FURNITURE, TOYS, CARRIERS, BLOG). A dark banner below the header states 'Free delivery on orders over £50!'. The main content area is titled 'PRODUCT MANAGEMENT' and contains a form labeled 'Add a Product'. The form fields are: 'Category' (a dropdown menu with 'Furniture' selected), 'Sku' (a text input field containing '12345678'), 'Name*' (a text input field containing 'Test Product'), 'Description*' (a large text area containing 'Adding test product for user story'), and 'Price*' (a text input field, currently empty).

The image below shows the product added along with a toast to show it was successful.

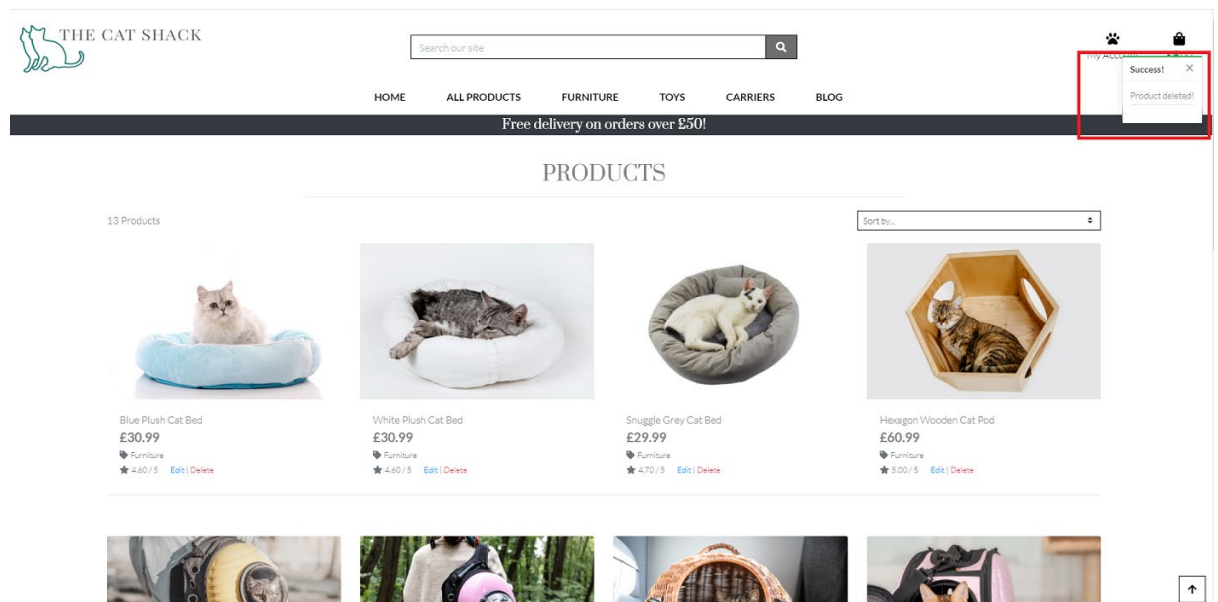

- Edit Product Information

Here the product has been added and the toast reflects this.

- Delete Products

When a product is deleted a toast is shown.

- Add Blog Posts

Blog post can be added by logging into the admin account – selecting posts, add status to publish and clicking save. See test post below.

The screenshot shows the Django administration interface. On the left is a sidebar with a menu: Home, Blog, Posts, Test Post. Below this are sections for ACCOUNTS (Email addresses), AUTHENTICATION AND AUTHORIZATION (Groups, Users), BLOG (Comments, Posts), CHECKOUT (Orders), PRODUCTS (Categories, Products), and SITES (Sites). The main area is titled 'Change post' and 'Test Post'. It contains fields for Title (Test Post), Slug (test-post), Author (bec), and Content (Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.). There is also a Status dropdown set to 'Publish' and a Thumb field with a 'Choose file' button. At the bottom are buttons for 'Delete', 'Save and add another', 'Save and continue editing', and 'SAVE'.

The post is then displayed on the blog template page
